

COMPRESSION SPRING 1 (CNT)

The Compression Spring 1 is used to maintain a constant tension on the electric fence wires. Wire tension on an electric fence will vary over time and the springs will maintain a constant force on the electric fence wires to keep them taut.

Features:

- A plastic inner which eliminates galvanic reaction between dissimilar metals, reduces rust and increases the lifespan of the wire
- Can be used with any type of electric fence wire
- Standard tension compression spring (silver) which can tension up to 1.2 mm wire
- Stainless steel spring maintains constant tension on the fence

Specifications:

Material	Stainless steel spring UV stabilised plastic inner
Colour	Black White
Spring Tension	Standard 5kg
Operating temperature	-40 to 80°C
Operating voltage	0 - 12KV
Recycling	SPI 2

Stock Code	Description
ES-CNT	Compression spring 1 Black
ES-CNTW	Compression spring 1 White
